A55281

Carboxylesterase (EC 3.1.1.1) egasyn - mouse

N;Alternate names: beta-glucuronidase endoplasmic reticulum-targeting protein; esterase-
C;Species: Mus musculus (house mouse)
C;Date: 10-Feb-1995 #sequence_revision 10-Feb-1995 #text_change 09-Jul-2004
C;Accession. A55281

A;Title: Cloning and expression of hydrolase C, a member of the rat carboxylesterase fam
A;Reference number: S71597; MUID:95177656; PMID:7872788
A;Recession: S71597
A;Status: not compared with conceptual translation
A;Molecule type: mRNA
A;Residues: 1-561 <YAN>
A;Residues: 1-561 <YAN>
A;Residues: 1-561 <YAN>
A;Reperimental source: liver; endoplasmic reticulum
C;Function:
C;Superfamily: cholinesterase; cholinesterase homology
C;Keywords: carboxylic ester hydrolase; endoplasmic reticulum; glycoprotein; liver
F;1-18/Domain: signal sequence #status predicted <SIGS
F;1-561/Product: carboxylesterase #status predicted <AGN>
F;50-561/Region: endoplasmic reticulum retention signal
F;79,301/Binding site: carbohydrate (Asn) (covalent) #status predicted
F;79,301/Binding site: carbohydrate (Asn) (covalent) #status predicted

Protein Sequence Searches - February 2005

All of the sequence databases on ABSS have recently been updated.

- Please note that the curators of the UniProt database have purged some temporary accession numbers from the most recent version of UniProt. These sequences have been assigned new permanent accession numbers. The new UniProt record may not contain the previous temporary accession number.
- If you encounter an accession number from an older search run against UniProt (results file extension .rup) that can no longer be found in the database, the permanent record with the new accession number can be found by searching the old accession number in the UniProt Protein Archive database (UniPARC) at:

http://www.pir.uniprot.org/database/archive.shtml

If you have any questions regarding this information or your results, please contact any STIC searcher.

When submitting sequence search results for scanning into IFW, please include a copy of this attachment to assist any future Examiners or members of the public who may encounter UniProt temporary accession numbers.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Hwang C.-S., Kolattukudy P.E.;

"Molecular cloning and sequencing of thioesterase B cDNA and

"Molecular cloning and sequencing of thioesterase B gene associated with

stimulation of expression of the thioesterase B gene associated with

hormonal induction of peroxisome proliferation.";

J. Biol. Chem. 268:14278-14284(1993).

-I-FUNCTION. Fatty acid biosynthesis chain termination and release of

the free fatty acid product is achieved by hydrolysis of the thio

ester by a thioesterase. This thioesterase may be associated with

peroxisome proliferation and may play a role in the production of

3-hydroxy fatty acid diester pheromones.

-I-TISSUE SPECIFICITY: Highest levels in uropygial gland, much lower
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       This SWISS-PROT entry is copyright.
